Initial Attack

How it worked

Who did it?

Conclusion

An innocuous text

*New secrets about torture of Emiratis in state
prisons http://go.osu.edu/not_a_virus*

What was vulnerable?

Zero Day exploits

Zero day exploits/vulnerabilities are exploits that are unknown to a product creator, meaning there have been zero days to patch it

Who did it?

- ▶ A little-known company called 'NSO Group'
- ▶ Based out of Tel-Aviv
- ▶ Sells malware to governments

Malware for sale

IT INVESTIGATION

Conclusions

Security should never be assumed as there are always malicious actors and unknown vulnerabilities that present a clear danger to information.
